Brandon Cullum
Chief Financial Officer
Alaska Electric Light and Power Company
5601 Tonsgard Court
Juneau, AK 99801-7201

Dear Mr. Cullum:

Alaska Electric Light and Power Company (AEL&P) filed TA489-1 on August 28, 2020, seeking to revise its Dusk to Dawn Lighting Rates to allow for the implementation of LED lights, to add an optional annual fee for lights installed on wood poles, and to add a provision to enable billing of small, unmetered loads for public entities. On October 8, 2020, the Regulatory Commission of Alaska approved Tariff Sheet No. 133, filed on August 28, 2020, Tariff Sheet No. 132, filed September 17, 2020, and Tariff Sheet No. 12, filed on September 18, 2020, by AEL&P in TA489-1. The effective date of the tariff sheets is October 12, 2020.

Enclosed are validated copies of the approved tariff sheets. Please note that the effective date has been added to the bottom right corner of each tariff sheet.

BY DIRECTION OF THE COMMISSION

Sincerely,

REGULATORY COMMISSION OF ALASKA

Julie C. Vogler
Finance Section Manager

Dusk to Dawn Lighting

Special Provisions:

- a. Monthly Billing
Charges for annual use will be billed monthly in 12 equal installments. T
L
- b. Less than 1 year use - Lamps disconnected within 12 months after installation will be billed for the remaining unused months upon disconnection.
- c. Lamp replacements - Lamp replacements will be made by the Company without additional charge. Outages shall be promptly reported to the Company. L
- d. In the event the customer wants to have a street light fixture changed to a larger size or otherwise modified the customer will pay for the cost of the change in advance.
- e. The Company will not maintain non-standard street lights installed by others and charged for on the basis of metered usage. D
- f. Small, unmetered loads providing a public service and operated by a public entity, such as flashing lights for a school zone operated by the City and Borough of Juneau, may be billed under this schedule at the rate which most closely matches the estimated annual cost to serve the unmetered load. N
N

Cost of Power Adjustment:

A surcharge or credit as shown in Schedule No. 98 may be applied to each billing for service rendered under this schedule.

Dusk to Dawn Lighting

Applicable to:

Outside street and yard lighting for governmental agencies, municipalities, private residences, farms and businesses for dusk to dawn lighting with lights mounted on wood poles with bracket attachments and connected to overhead secondary circuits.

Rate: Per Year

100	Watt, per light	\$115.96
150	Watt, per light	\$173.87
175	Watt, per light	\$202.88
200	Watt, per light	\$231.78
250	Watt, per light	\$270.94
400	Watt, per light	\$357.81
1000	Watt, per light	\$711.82

Light Emitting Diode ("LED") Rate: Per Year

100	Watt-equivalent	\$ 90.59
250	Watt-equivalent	\$192.90
400	Watt-equivalent	\$275.15

Upon exhaustion of existing inventory of non-LED fixtures and parts, the Company will no longer provide new or maintain non-LED light fixtures under this schedule. Customers who request an LED fixture to replace a functional non-LED fixture will be charged a fee equal to the annual rate for the fixture being replaced.

In cases where an existing wood pole is not available, each light on a dedicated wood pole will be charged the following additional pole fee.

Dedicated Wood Pole Rate: Per year \$216.50

Minimum Charge:

The minimum charge shall be the same as the rate per year.

Effective

October 12, 2020

RULES AND REGULATIONS

1. General (continued)

Demand: The maximum rate of delivery of electric energy during a month, measured in kilowatts (kW) and registered as the highest average rate of energy used over any fifteen minute period during the month.

Deposits: That sum of money paid to the Company and retained for a given length of time and returned at the end of the said time, providing all necessary requirements for refund are met.

Dedicated Wood Pole: A wood pole serving the sole function of supporting a streetlight. N

Electric Service: The availability of electric energy at the point of delivery for use by the customer, irrespective of whether electric energy is actually used.

Engineering: Engineering includes the preparation of electric layouts, designs, specifications, and other drawings and lists associated with electric construction. It also includes making construction estimates, inspecting construction for conformance with design criteria and specifications, staking, and labor costs associated with right-of-way acquisition, right-of-way clearing, administration, and similar related activities necessary to the installation of electric distribution facilities.

Final Subgrade: The final grade specified by the governing agency to which the roadway is to be constructed unless finish material (such as asphalt) is to be placed, in which case the final subgrade is the grade specified by the appropriate agency prior to placement of the finish material.
